

KYB-170-OEM

Wearable OEM Keypad

Designed for integration into wearable technology, the KYB-170-OEM is a ruggedized alphanumeric keypad built for exceptional EMI performance.

This 17-key, ultra-compact keypad utilizes sequential key presses to access both alphabetic and numeric characters – similar to the texting function of a cell phone. In addition, it includes an integrated Force Sensing Resistor (FSR) pointing device and multiple levels of backlighting that are available in almost any LED color, including NVIS Green B. Built for use in harsh areas, the KYB-170-OEM is sealed to NEMA 4X specifications when properly sealed and is designed to meet MIL-STD-461E requirements for radiated susceptibility.
