

PM-102-SS

Panel Mount Stainless Steel Keyboard with Touchpad

iKey has combined the convenience of a panel-mounted, touchpad keyboard with the rugged strength of stainless steel in the new PM-102-SS industrial keyboard. Stainless steel is known for its longevity, corrosion resistance and ability to retain strength in extreme temperatures. It's also low-maintenance and easy to clean. Each of these characteristics make stainless steel an excellent material for keyboards used in industrial and food processing applications. The durable PM-102-SS is completely sealed and designed to meet NEMA 4X and IP66 specifications when properly installed.
